

MMD / Monitor

July 2, 2004

Re: MMD / Monitor Lead Free Update

MMD / Monitor has instituted our program to eliminate lead from our products. Our Pb free program is in full compliance to the European requirements of RoHS (Restriction of Hazardous Substances) and WEEE (Waste from Electrical and Electronic Equipment). These directives were introduced in December 2002, and require compliance by July 1, 2006.

MMD / Monitor fully intends to be compliant by July 2006 in regards to Pb free products. Please also note that the RoHS Directive contains several express exemptions from its substance bans for certain lead applications and lead containing products. MMD / Monitor will still supply many of our custom / qualified products in line with the exemption guidelines.

Today MMD / Monitor offers the following oscillators and crystals that are Pb free internally and externally in compliance with RoHS:

Pb Free Crystal Products:

(Series) G, H, I, J, P, R.

Pb Free Oscillator Products:

MIH, MIP, MITH, MILH, MIMH, MINH.

All of our Pb free products can be wave soldered at temperatures not exceed 260 deg. C.

If you have any further questions regarding our Pb product line, please contact your sales representative or MMD / Monitor directly.

Sincerely:
